

eLearning Client Feedback

I have to say that dollar for dollar, the elearning offered by EBG Consulting was the best I have taken. I completed *Foundation for Requirements Development and Management* eLearning and the material is well presented in manageable segments, clearly articulated with excellent supporting graphics. The templates provided have proven to be useful long after I finished the course over one year ago. I was able to work through the course at my own pace at my own desk, and read and review the material as I chose. Definitely time wisely invested and money well spent.

Karen Johnstone, Business Analyst, Scotia Bank (posted on BATimes)

The self-paced Software Requirements e-training *Roadmap to Success: Foundation for Requirements Development and Management* was a wonderful course for me as a Business Analyst to better recognize and understand the most effective methods for gathering, analyzing, and managing requirements throughout the entire life-cycle of a project.

Molly McIver, Business Analyst, Baker Hill, An Experian Company

I found the training to be very helpful in respect to bringing context to the skills I already have and adding to the understanding of the total package.

All of the members of the BA team I am on have taken your training and all new members are expected to complete it as part of their onboard experience. It gives us all a common vocabulary and understanding of how we will proceed as a team.

Carl Starkweather, Senior Business Analyst, RSM McGladrey, Inc.

The real world cases clarified my understanding of the concepts and allowed me to better grasp how the course material is used in the real world.

Ian Smith, Business Analyst

The course was informative. There were also a lot of downloads that I am sure will prove to be helpful.

Sandra Nelski, Gratium

... an excellent overview.

Kelli Davy, Gratium

We have instituted a user group to reinforce the learning experience.

Lori Willette, Unum
